Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to apparatus, classified in class 118, subclass 420.
- II. Claims 8-10, drawn to method, classified in class 427, subclass 117.

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be practiced by another and materially different process such as coating an optical fiber.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney Griffith on 10/20/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication should be directed to Brenda A Lamb at telephone number (571) 272-1231. The examiner can normally be reached on Monday and Wednesday through Friday with alternate Tuesdays off.
